Introducing Haverland heaters

we are now a distributor

Welcome to the world of new generation electric heating

As electric power becomes increasingly popular as a preferred source of heating for homes and businesses in the UK, more consumers are switching to Haverland.

Haverland is at the forefront of design and technology advancement in 'New Generation' electric heating.

Their lightweight thermo-dynamic, high-density fluid and 'Dry Stone' Thermo media, intensifies the performance and effectiveness of each radiator ensuring that heat is evenly distributed across the whole surface

In addition, their built-in digital programme controllers allow the temperatures and heating schedule of each radiator to be set to create individual 'comfort zones' throughout a building or specific area.
