

WE NOW STOCK KIDDE ALARMS

The only fast-fit rechargeable smoke and heat alarms for 10 years

- New wireless interconnect capability
- New screwless double decker terminal block
- New wireless remote test and hush switch

Developed specifically to solve problems encountered with many other alarms for UK social and private housing, Slick® is still the only range of fast-fit rechargeable smoke and heat alarms guaranteed for 10 years. Now, the second generation NEW Slick® includes the latest technology and extra features making it even better and the cost saving alternative for housing today.

Simple Installation

All Slick® Alarms incorporate a unique fast fit system saving installers time and money. Here, the separate base plate can be installed and its integral terminal block wired at first fix if appropriate. Then, near completion the alarm simply slides onto the base plate hinge flap and locks into place by default. No cable harness is needed and the unique hinged connector makes removing the alarm for maintenance that much simpler, as it will hang on the hinge until pulled off. For maintenance alarms are simply replaced on existing base plates without rewiring.

Why wireless?

Ideal for retrofitting of alarms or where occupant is disabled or elderly & needs remote Test & Hush feature on alarms. Save labour & material costs* of wiring 3 core & earth cable between all interconnected alarms.

*And associated costs related to disruption, chasing out plasterwork, making good etc

NEW Slick® Range 230V mains Fast-fit Alarms. Some Key features include

- Wireless capability enabling use with new Kidde Fyretics wireless alarm base for wire free interconnection
- Compatible with Kidde Fyretics new remote test and hush switch via the wireless alarm base
- integral, double decker screwless terminal block for fast, push fit connection
- Green & Red Leds to indicate alarm status
- up to 6 months continuous operation from back up cells, in the event of a mains failure
- 30 days low battery warning indicator
